Data Pooling

Services in a Data Pool contribute their data allowance to the pool of data available to all services in that pool. Only services in the same Data Pool contribute to and consume data from that Pool. Data cannot be shared across Data Pools. A maximum of 300 services can be in a single Data Pool. Multiple Data Pools may be created. Services in a Data Pool must all be on a Data Pooling plan but may be on different Data Pooling plans. A Data Pool must be either auto or manual top up. Data banking is not available with Data Pooling. Data Pooling is not available overseas.

Priority Assistance

Priority Assistance is designed for eligible customers who have a diagnosed life-threatening medical condition and rely on a working fixed-line telephone service for their health and safety. Our services do not support Priority Assistance. However, you may still be able to contact emergency services by dialling Triple Zero (000), provided you are within mobile coverage of an available Australian mobile network. Please note that mobile emergency calls are dependent on network availability, coverage and signal strength, and a connection cannot be guaranteed in all circumstances. If Priority Assistance is required, you should contact a provider that offers this service, such as Telstra, to discuss your eligibility and service options.
